Check out the *Species-at-Risk in New Brunswick Education Kit 2003* for grades 4 and 7. This project is developed primarily for teachers in New Brunswick by the New Brunswick Federation of Naturalists, but can complement curriculum in any province. It is a key source for hands-on, classroom-ready activities and lesson plans for teachers and students, complementing the provincial curriculum, and available in both English and French. For copies of the kit, please contact:

### **New Brunswick Federation of Naturalists**

924 Prospect Street  
Fredericton NB E3B 2T9

Another excellent resource is *Special Places: Eco-Lessons from the National Parks in Atlantic Canada* published by Parks Canada. This interactive curriculum supplement is designed for students and teachers in both the elementary and secondary levels, and explores biological diversity, species at risk, ecosystems, habitat protection and more. The activities combine research, discussion, and group work, and are all linked to the Atlantic Canada Science Curriculum. For copies of *Special Places* please contact:
